SUMMARY

Recent graduate with hands-on experience in AI application development, FastAPI, Python, PostgreSQL, and Large Language Models (LLMs). Currently working as an AI/LLM Intern at Coastal Seven Technologies, contributing to the development of an AI University ERP Copilot using RAG architecture and modern AI technologies. Passionate about backend development, machine learning, and building scalable AI-powered applications.

TECHNICAL SKILLS

Languages: Java , C , Python

Tools & Technologies: VS Code, Git, Github, Postman

AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering

Backend Development: FastAPI, REST APIs, SQLAlchemy

Libraries: Streamlit, Numpy, Pandas, Scikit-learn

Databases: MySQL, PostgreSQL

EXPERIENCE

Coastal Seven Technologies

Apr 2026 – Present

AI/LLM Intern

- Contributing to the development of an AI-powered University ERP Copilot for students, faculty, and administrators.
- Developed document ingestion and retrieval workflows using RAG architecture.
- Built backend APIs using FastAPI for AI-powered question-answering services.
- Implemented semantic search using embeddings and vector databases.
- Collaborated with development teams using Git and Agile workflows.

PROJECTS

Customer Churn Prediction

- Developed a customer churn prediction model with 98% accuracy using machine learning algorithms (Random Forest, XGBoost) to identify potential churners
- Engineered features from imbalanced data and utilized SMOTE to improve model performance, effectively detecting churn risks.

MultiModel Data Processing System

- Developed a Multimodal Data Processing System capable of extracting and analyzing text, audio, and visual data from various file formats (PDF, DOCX, PPTX, images, audio, video) using Python, OCR, and speech-to-text models..
- Implemented semantic search and natural language querying using embeddings and ChromaDB, enabling context-aware answers with source-based citations through an integrated LLM-powered interface..

AI University ERP Copilot

- Built an enterprise-grade AI Copilot leveraging RAG, embeddings, and LLMs to provide real-time, context-aware assistance across university operations.
- Developed end-to-end AI workflows including document ingestion, semantic search, knowledge retrieval, and conversational question-answering using Python and FastAPI.

EDUCATION

Vasireddy Venkatadri Institute of Technology

Bachelor of Technology(Computer Science) - **CGPA - 7.8**

2021–2025

Guntur, Andhra Pradesh
